

## PROFILE INFO

QA Engineer with more than 5 years of experience from simple landings to high-load banking projects. I love complex tasks, teamwork, and of course to see the result of my work. I don't miss deadlines, run successful demos, and reduce the company's costs of fixing errors in production. Lately I've been working with web projects. In the future, I am interested in developing into automation and front-end development.

### Location

Belarus, Minsk
